CAREER OBJECTIVE

AI/ML-focused software engineer with hands-on experience in machine learning, backend systems, and generative AI. Skilled in Python, Scikit-learn, FastAPI, and deploying AI-powered APIs on AWS. Passionate about building scalable AI solutions and solving real-world problems through data-driven engineering.

PROFESSIONAL EXPERIENCE

Associate Software Engineer – Backend & AI Engineer

Primesoft Solutions Pvt. Ltd. **June 2025 – Present**

- Developing an AI-powered chatbot using semantic search and vector databases to retrieve relevant information and generate LLM-based responses.
- Built backend pipelines integrating Python, LangChain, and AI models for intelligent query processing.
- Designed and deployed scalable APIs for real-time AI interaction and optimized system performance.

Tech Stack: Python, LangChain, FAISS, OpenAI APIs

Python Developer Intern

Venago Innovations **June 2024 - September 2024**

- Designed and implemented a comprehensive dashboard using REST APIs, AWS Lambda, API Gateway, and DynamoDB for dynamic data visualization and management.
- Developed Python-based REST APIs using the Flask framework to enable smooth communication between services.

PROJECTS

Early Pest Detection System Using Computational Intelligence

- Built an ML-based computer vision system for early pest detection using image preprocessing, feature extraction, and classification models. **Feb 2024 - May 2024**
- Performed data cleaning, model training, and evaluation to improve detection accuracy.
- Integrated the model with backend APIs to simulate real-world AI deployment.
- Tools & Tech: Python, OpenCV, Scikit-learn

EDUCATION

Bachelor of Technology (B.Tech) in Computer Science & Engineering – Data Science

ACE Engineering College, Hyderabad	2020 – 2024	CGPA: 8.33
Intermediate – SR Junior College, Hyderabad	2018 – 2020	89%
SSC – Panchavati Vidyalaya, Mahabubnagar	2017 – 2018	95%

SKILLS

- Languages: Python
- ML Libraries: Scikit-learn, NumPy, Pandas, PyTorch, TensorFlow
- LLMs and GenAI: RAG, CAG, LLMs, LangChain, Claude AI, Crew AI, BeeAI
- Frameworks: Flask, FastAPI
- AI/ML: Machine Learning, Generative AI
- Data: Data Cleaning, Preprocessing, Visualization, Model Evaluation
- Tools: Git, Jupyter Notebook, BitBucket
- Cloud: AWS (Lambda, API Gateway, DynamoDB)
- Database: MySQL
